£1 off

MAM ULTivent anti-colic feeding bottles.

Only one coupon may be accepted per pack purchased.

Naturally breast feeding is best.

Which is why MAM have designed a bottle to be the best alternative to the breast, whether you use it for expressed milk or for complementary feeds. The unique shape of the soft Ultivent teat is textured to feel just like Mum's skin. The ultra sensitive valve, positioned in the screw off base, assures a constant air free flow. Less air intake reduces colic.

Together the new Ultivent bottle system give your baby "breast-like" feeding for longer uninterrupted periods.

Available in a range of pastel colours.
